Objective

Self-taught Software Engineering student seeking a remote internship to apply programming skills, aiming to contribute to innovative solutions at a leading tech company.

About

Driven first-year Software Engineering student and self-taught programmer with expertise in hardware repair, software development, and system optimization. Skilled in programming, troubleshooting, and mentoring peers to deliver client-focused solutions.

Experience

Computer Technician   Jun 2020 – May 2023
Felix Computers

- Configured Windows, Linux, macOS on 100+ devices, achieving 98% client satisfaction.
- Resolved hardware/software issues, cutting repair time by 30% via optimized workflows.
- Built 50+ custom PCs for gaming, programming, design, using multi-vendor components.
- Upgraded systems with SSDs, RAM, processors, boosting performance by up to 40%.

Projects

User Authentication System   2024
HTML, CSS, PHP, SQL

- Built a secure login/registration system with SQL database storage.

Personal Portfolio Website   2024 – Present
HTML, CSS, Next.js, Azure

- Created a portfolio with projects, resume, and an Azure AI chatbot (blog in progress).

Coursework: Games and Calculators   2024
C++, Python

- Developed guessing games and BMI calculators using data structures.

Education

Bachelor of Technology in Information Technology   Expected Aug 2028
Takoradi Technical University, First-Year Student

Skills

- **Programming**: Python, C++, Java, HTML/CSS, PHP, SQL, Next.js, Azure
- **Technical**: Hardware Repair, Data Structures, VS Code, Git, GitHub
- **Self-Learning**: Udemy, YouTube, books (e.g., Think Python, HTML/CSS by Jon Duckett)
- **Soft Skills**: Problem-Solving, Communication, Leadership (mentor and group leader), Adaptability
